HOLISTIC NUTRITIONAL THERAPY INFORMED CONSENT AND DISCLAIMER

_____, Nutritional Therapist
(Insert Name of NT)

Before you choose to use the services of a Nutritional Therapist, please read the following information **FULLY AND CAREFULLY.**

GOAL: Our basic goal is to encourage people to become knowledgeable about and responsible for their own health, and to bring it to a personal optimum level. Nutritional therapy is designed to improve your health, but is not designed to treat any specific disease or medical condition. Reaching the goal of optimum health, absent other non-nutritional complicating factors, requires a sincere commitment from you, possible lifestyle changes, and a positive attitude. A Nutritional Therapist is trained to evaluate your nutritional needs and make recommendations of dietary change and nutritional supplements. A Nutritional Therapist is not trained to provide medical diagnoses, and no comment or recommendation should be construed as being a medical diagnosis. Since every human being is unique, we cannot guarantee any specific result from our programs.

HEALTH CONCERNS: If you suffer from a medical or pathological condition, you need to consult with an appropriate healthcare provider. A Nutritional Therapist is not a substitute for your family physician or other appropriate healthcare provider. A Nutritional Therapist is not trained nor licensed to diagnose or treat pathological conditions, illnesses, injuries, or diseases.

If you are under the care of another healthcare provider, it is important that you contact your other healthcare providers and alert them to your use of nutritional supplements. Nutritional therapy may be a beneficial adjunct to more traditional care, and it may also alter your need for medication, so it is important you always keep your physician informed of changes in your nutritional program.

If you are using medications of any kind, you are required to alert the Nutritional Therapist to such use, as well as to discuss any potential interactions between medications and nutritional products with your pharmacist.

If you have any physical or emotional reaction to nutritional therapy, discontinue their use immediately, and contact your Nutritional Therapist to ascertain if the reaction is adverse or an indication of the natural course of the body's adjustment to the therapy.

COMMUNICATION: Every client is an individual, and it is not possible to determine in advance how your system will react to the supplements you need. It is sometimes necessary to adjust your program as we proceed until your body can begin to properly accept products geared to correct the imbalance. It is your responsibility to do your part by using your nutrition guidelines, exercise your body and mind sufficiently to bring your emotions into a positive balance, eat a proper diet, get plenty of rest, and learn about nutrition. You must stay in contact with the Nutritional Therapist so we can let you know what is happening and the best course of action.

You should request your other healthcare provider, if any, to feel free to contact the Nutritional Therapist for answers to any questions they may have regarding nutritional therapy.

LICENSURE. A Nutritional Therapist is not licensed or certified by any state. However, a Nutritional Therapy Practitioner™ is trained by the Nutritional Therapy Association, Inc.® which provides a certificate of completion to students who have successfully met all course requirements, including a written and practical exam. A license to practice Nutritional Therapy is not required in some states. Laws and regulations regarding certification and licensure requirements differ from state to state.

By my/our signature(s) below, I/we confirm that I/we have read and fully understand the above disclaimer, are in complete agreement thereto and do freely and without duress sign and consent to all terms contained herein.

The Pulse Test (Lingual-Neuro Test)

Purpose: A simple 2 ½ minute self-test to determine if a particular food or supplement causes a stressful reaction. *Note: This test may not be valid if you are taking a drug that controls your heart rate, such as a calcium-channel blocker or a beta-blocker.*

Procedure:

1. Sit down, take a deep breath, and relax.
2. Establish your baseline pulse by counting your heart beat for one full minute and record your pulse in the "Before" space in the Pulse Test Record below.
3. Put a sample of a food or supplement to evaluate in your mouth (on your tongue). You may chew but refrain from swallowing. You do need to taste it for approximately 30 seconds.
   Note: The sensory information taste signals from your mouth will inform your central nervous system (brain) as to the nature of the test substance. If the test substance (food or supplement) is stressful to the body, you will have a brief reaction that causes your heart to beat faster. Test only one food at a time. Testing individual ingredients will yield specific information, compared with testing foods containing multiple ingredients. Testing a banana, for example, yields more specific, and therefore more valuable, information than testing banana bread.
4. Retake your pulse with the food or supplement still in your mouth. Write down your "After" pulse on the Pulse Test Record.
   Note: An increase of 6 or more is considered the result of a stressful reaction. The greater the degree of stressfulness or reactivity, the higher the heart rate will be.
5. Discard the tested ingredient (do not swallow) and repeat the procedure to test other foods or supplements. Repeat the procedure as frequently as you like, as long as you always return to your normal pulse before testing the next food.
   Note: If a reaction occurred, rinse your mouth out with some purified water and spit the water out. Wait two minutes, then you can retest your pulse to see if it has returned to its baseline. If it hasn't, wait a couple more minutes and retest. Continue to retest until you have returned to your normal pulse. Once your pulse has returned to its normal rate, you can test the next food.
6. Make an appointment to go over the results of this test as soon as possible or bring this record with you to your next appointment.
